

## RED CROSS WORKS AT ALL TIMES

Anna Schlundt, Seventh Grade Pupil, Reviews Relief Organization and Tells of It's Founder.

The following is a Red Cross story written by Anna Schlundt of the seventh grade of the Elementary School.

Nurses are very important and we could hardly get along without them, especially in the war that is going on now. They are needed to take care of the sick at all times in both private homes and hospitals.

Before the time of trained nurses women would go around and care for the sick and wounded. They made broth, tea and other things for them and used herbs for medicines. For liniment they used oil from animals and geese. The nurses were usually old women or widows who lived in the village. These women were not trained like the nurses nowadays nor did they have the materials or medicines to work with.

There are different kinds of nurses; red cross, hospital and visiting. The Red Cross nurses are sent out by the Red Cross Society. They help in case of fires, floods, wars and other calamities. The hospital nurses take care of the sick at hospitals and also nurse in private homes and help in operations. The visiting nurses visit the homes of the poor and teach them how to take care of themselves. They hold meetings and teach mothers how to feed their babies and also teach hygiene to school children.

## Lack of Fresh Air Causes Disease.

All nurses should follow approved health rules and teach their patients to do the same. In a great many of the tenement houses the poor people do not get air enough and sometimes they have only one window in a room. In this way they are very apt to get diseases, especially tuberculosis. When people have tuberculosis or pneumonia they need a great deal of fresh air.

In order to keep strong, people also need the right kind of exercise. A great many people do not get enough exercise because they live in large cities and do not have time for it. The right kinds of food are also very important. Some occupations require more food than others. People should also be careful about the water that they drink. They should see that it comes from clean places. Water can carry germs which cause diseases like typhoid fever and cholera. If germs are thought to be in the water it is best to boil it.

Cleanliness is another important thing that should be looked after very carefully, especially in large cities which are very dirty in the poor districts. People are very apt to get diseases if they do not live in clean houses with clean surroundings.

It is very important to know how to prevent diseases. When people come down with contagious diseases they should be isolated from others. After contagious diseases the house should be disinfected. Many other diseases can be prevented by proper care.

## First Aid Remedies Suggested.

All people should know something about first aid to the injured and should be able to do something in an emergency. If an artery in the leg

should be cut and one is where a doctor cannot be called, the best thing to do is to fold a handkerchief crosswise and tie a knot in the middle, then tie it around the leg with the knot just above the cut. Next take a pencil, put it under the handkerchief and twist it around till it is very tight and the bleeding stops. Call a doctor as soon as possible. If a vein in the arm is cut one should tie a handkerchief both above and below the cut. All smaller cuts should have an antiseptic put on them at once and be bandaged.

Burns and bruises are very common and unless they are taken care of are very painful. If in case of a burn, the skin is not destroyed it is best to bathe the burn with soda and water and bandage it lightly. If the skin is destroyed it is best to cover it so that air will not get to it. Baking powder covered over the burn with cotton on top is good, or soda and oil. For serious burns it is best to call a doctor. The best thing to do for bruises is to put witch-hazel on them to take out the soreness.

If an arm or leg should be broken call a doctor at once to set it. In order to keep the swelling down before the doctor comes bathe it with cold water.

## Clara Barton Organized Work Here.

Two famous nurses are Clara Barton and Florence Nightingale. Clara Barton was born in 1821 at Oxford, Mass. She lived on a large farm when she was a little girl and learned to do a great many things. When she grew older she became a school teacher and taught quite a while until she lost her voice. She then went into government work and she was in this work when the war broke out. When she set out taking care of the wounded she went right to the battlefields and took care of the soldiers in tents. After the war was over she was in ill health and went over to Switzerland to rest. While she was there she became interested in the Red Cross which had been started in that country. During the Franco-Prussian War she recognized the efficiency of the Red Cross organization and when she came back to America organized the Red Cross in this country. She helped in the Mississippi River floods, the Charleston earthquake, the Johnstown flood and the Spanish-American War. Clara Barton lived past her ninetieth birthday.

Florence Nightingale was born in Florence, Italy, in 1820. When she was small she loved to take care of sick people in the village, and also the different pet animals. When she grew older she went to a training school for nurses. Soon after the Crimean War broke out she got a band of women to go with her to take care of the wounded soldiers. This movement turned out to be very successful. They found conditions very bad and worked very hard and accomplished a great deal until she became sick. When she was well enough she went back to England and there she stayed until she died.

## RIBBON FOR BEST SHOW WINDOW

Educational Values of Exhibits During Baby Week to Be Considered.

The Child Welfare Association will award a ribbon to the best window exhibit by Columbia stores during Baby Week for educating mothers in the care of their children. Emphasis will be placed upon the educational value of the articles displayed, rather than upon the size or elaborateness of the exhibit or upon the artistic arrangement of the articles.

A committee will be appointed to judge the displays. The drug, dry goods, grocery, hardware and electrical supply stores will have displays.

## Christian College Notes

Miss Marie Pettijohn is at her home in Gallatin for several days, week-end in St. Louis.

Mrs. Linnie Carl of Portland, Ore., a national worker in the W. C. T. U., was a guest of the college during her visit to Columbia.

Dr. L. R. Doolin and his daughters, Mrs. Sam Tolbert and Mrs. George Poage of Gallatin were guests of Miss Georgia Doolin Tuesday.

Woodson Moss, Jr., of Kemper Military Academy, was the week-end guest of his father, Dr. Woodson Moss.

Mrs. Mary P. Hickman, secretary of the college, and her daughter, Miss Anne Humphreys Hickman, were dinner guests of Mrs. H. S. Lansing Thursday evening.

Misses Robbie and Donnalisa Standifer and Miss Marjorie Cochran were guests at the Kemper annual spring party at Boonville on Friday night.

Announcements have been received by college friends of the marriage of Gertrude Livingston, class of 1908, at

## CATHOLIC STUDENTS TO HAVE CLUBHOUSE

Project Receives Much Favor at Banquet for Visiting Knights of Columbus.

COST WILL BE \$35,000

Present Plans Are to Lay the Cornerstone Not Later Than June 1, 1918.

The cornerstone of the proposed clubhouse and social center for Catholic students of the University, which will cost \$35,000 and have rest rooms, game rooms, reading rooms, and an auditorium, will be laid not later than June 1, 1918, if the plans outlined by speakers at the Knights of Columbus banquet at the Virginia Grill last night are carried to completion. The banquet, while held in honor of the committee from the state council of the Knights of Columbus, was primarily to get the opinion of influential Missouri Catholics on building the clubhouse.

Welcoming addresses were given by the Rev. T. J. Lloyd of the Sacred Heart Catholic Church, Columbia, and Mayor J. E. Boogs. Mr. Boogs commented on the necessity of religious clubs to better the influences of the community.

President A. Ross Hill pointed out that science, while making gigantic strides towards the betterment of the world, is losing sight of the fact that ideals and idealism are necessary things in life, and that this idealism can be supplied only by religion. "Science and religion," he said, "must be harnessed and must work together. If the proper balance is to be maintained." President Hill welcomed cordially the building of the proposed clubhouse, which will be the first of such a nature here. He declared that it is highly undesirable that a student break his religious bonds.

## University Graduate a Speaker.

Scott Meyer, state committeeman from Hannibal, and a graduate of the University, spoke briefly on Catholic patriotism and urged that the standard be maintained in the present crisis. William J. Meyer, father of Scott Meyer, spoke on "Remember the Other Fellow."

R. A. Muttowski of the biology department, a graduate of Wisconsin, told of the religious work maintained at Wisconsin and of the organization of the first Catholic clubhouse there in 1882. He told also, of the part played in its founding by J. J. McAnaw, father of the three McAnaw boys now attending the University, who died recently at his home at Cameron. Catholic clubhouses exist in various state and endowed universities, including Harvard, Iowa, California, Leland Stanford, and Wisconsin, with the largest membership, 700, at the last-named school. The chapel there cost \$50,000, \$40,000 of which was paid by the Catholics of the state, who also contribute to its upkeep.

## Father McCordie for Tolerance.

The Rev. Francis McCordie of the Catholic Church at Warrensburg, spoke strongly against the man who preaches against the other fellow, declaring such a person a traitor, and that the only course open to present day people is one of broad tolerance.

Mayor W. B. Nivert of Glasgow spoke on patriotism among the Knights of Columbus and the ideals of the organization.

Joseph Kane of St. Louis, state deputy of the Knights of Columbus, was the concluding speaker of the evening. He declared that the building of the home for Catholic students in Columbia would be started by September 1, if possible, but not later than June 1, 1918, and guaranteed that the district organizations of the Knights of Columbus in St. Louis would back the idea and insure its ratification. One thousand dollars, he said, already had been subscribed in St. Louis by the Knights of Columbus.

In intervals between speeches the quartet of the University Glee Club sang selections. After the speeches, a dance was held. The banquet was in charge of Mrs. J. P. Heibel and Mrs. E. F. Ruether, assisted by the women and girls of the parish. Hubert P. Malkus, a student in the School of Journalism, was the toastmaster. The banquet committee was composed of Daniel J. Sullivan, Thomas J. Hutton, Jerome Kircher, John P. Heibel and Mr. Malkus.

It was announced the next state convention of the Knights of Columbus would be in St. Louis May 8 and 9.

Miss Simons Has Appendicitis.

Miss Adelaide Simons, a student in the College of Arts and Science, was admitted to Parker Memorial Hospital yesterday. She is ill with appendicitis.

## STUDENT WORKERS NEEDED NOW

Many Positions Left Open by the Departing Agricultural Students.

As a result of the back-to-the-farm movement among University students, the Y. M. C. A. employment bureau has more calls for student workers than it can fill. According to Sylvester Voss, secretary of the bureau, many of the men who are leaving school are of the student working class. The bureau has been besieged of late, he says, by these men wanting to give up the present positions. Notices now at the Y. M. C. A. Building advertise several desirable positions.

## Jack Cannon Seeks Lieutenantcy.

Jack Cannon of Kansas City former Missouri state tennis champion and a former student of the University of Missouri, plans to take examinations at Fort Leavenworth, Kan., for a lieutenantcy in the United States Army.

## First Alpha Zeta Lecture Given.

Prof. E. W. Lehmann spoke on "Applied Agricultural Engineering" last night in the Agricultural Auditorium. This was the first of a series of public lectures which will be given under the auspices of the Alpha Zeta, an honorary fraternity.

## G. W. Catts to County Agent Work.

George W. Catts left this morning for Saline County, where he will be assistant county agent. Mr. Catts is a senior in the College of Agriculture.
